To me, spring means that we're getting closer to summer and getting ready for trips. Every year, my family and I travel to the beach. I like traveling to the beach because it’s time to see my family and friends. Most of my family lives at the beach, so I basically only see my cousins when we go to the beach.

One of my favorite memories was last year. I was finally tall enough to ride the Impulse at Knoebels Grove. The Impulse is a giant roller coaster that has a very steep drop. The closer I got in line, the more scared I got. When we sat down, they put the safety belts on us and off we went. It went slow as we climbed up and when we got to the top...[bang!] Off we went into the loop! In like 1 minute and 5 seconds the roller coaster was over.

I personally am looking forward to dance mentors. At a competition, we won an award for professional mentors to come to our dance studio. They’re going to teach us how to audition, give us classes, and pick some people to dance in a dance that they choreograph.

The BENV Kiwanis can help kids in our community by having some schools do career days, donate back-to-school supplies, make a tutoring program, and help kids in hospitals get what they need to keep up with their school work. These are some ways that I thought of, but there are many different ways the BENV Kiwanis could help the kids in our community.
