Spring Beginnings by Hannah Westerbaan

Spring is a time for new beginnings and growth. A lot of animals are born in spring like bunnies and chicks. Flowers start to bloom, and the grass turns green in spring. Also, the leaves come out on the trees and buds start to bloom. The farmers get their gardens ready. They plow the fields and then they can plant the seeds. With lots of sunshine and rain the seeds will start to grow and plant appear.

In the summertime I like to swim in my pool and do handstands under water. My favorite place to go on vacation is the beach. At the beach I like to play in the sand and look for seashells. I also like to swim in the ocean. During the summer I like to spend time outside and play with my dog. I like to take my dog to the park and ride my bicycle there as well.
