Spring Essay by Harper Westerbaan

Spring is a time for new beginnings. Baby birds are born in the springtime. My class hatched baby chicks at school. We learned they take 21 days to hatch. We learned what was going on inside the egg before the chicks hatched. I really liked it!

In the spring my family starts a garden. My Dad rototills the garden to get it ready for planting. When the weather warms up, we can plant our seeds and plants. I like to watch the plants grow and then help pick the vegetables.

I like to swim in the summer in our swimming pool. I like going on vacation to the beach. It is fun to look for seashells and swim in the ocean.

Our garden sprouting

Harper. W.
