# Web Page Visibility

# What is Page Rank?

PageRank (PR) is an algorithm used by Google Search to rank web pages in their search engine results

A way of measuring the importance of website pages

Works by counting the number and quality of links to a page to determine a rough estimate of how important the website is.

The underlying assumption is that more important websites are likely to receive more links from other websites

# Why is Page Rank Important?

Determines if your page gets practically returned in a search result or not

Determines if users can find your content or not

# Good Web Page Visibility Attributes

High-quality content that users are looking for

Content contains words users would type to find your page

Title describes content

URL describes content

Other sites are natural-linking to the page

Easily read by accessibility tools

Accurate image and link descriptions

Page should be reachable from at least one static text link

# Top 3 Things To Do

Give visitors the information they're looking for

Make sure that other sites link to yours

Make your site pages easily accessible

Give visitors  
the  
information  
they're  
looking for

The bookmark test

Use Google Ads to find out  
what people are searching for

# The bookmark test

Would you yourself bookmark  
the page you created?

If not, try to improve the page  
content

# Create a Logical Content Structure

Page section headings

Page section sub-headings

Bolded text

Citations and references if applicable

Include keywords from Keyword Planner where appropriate

**<h2>Heading 2</h2>**

**<h3>Heading 3</h3>**

**<h4>Heading 4</h4>**

**<h5>Heading 5</h5>**

**<h6>Heading 6</h6>**

## Section Headings

- <h1> Most important
- <h6> Least important
- <h1> is a heading
- <h2> - <h6> are sub-headings

# Bolded Text

- Search engines may treat bolded text as more important than unbolded text, in the right context
- Use the `<strong>` HTML tag
- **Kiwanis.org text example**
  - *Today, we stand with more than 550,000 members from K-Kids to Key Club to Kiwanis and many ages in between in 80 countries and geographic areas. Kiwanis clubs host nearly 150,000 service projects each year.*

How can we  
improve this  
page?

---

What can we  
emphasize?

## KIDS AT HEART

Kiwanis International is a global community of clubs, members and partners dedicated to improving the lives of children one community at a time. Today, we stand with more than 550,000 members from K-Kids to Key Club to Kiwanis and many ages in between in 80 countries and geographic areas. Each community has different needs, and Kiwanis empowers members to pursue creative ways to serve the needs of children, such as fighting hunger, improving literacy and offering guidance.

# Headings in Wordpress

The screenshot shows the WordPress editor interface. At the top, there's a navigation bar with 'Kiwanis', '8', '0', '+ New', 'View Page', and 'Howdy, admin'. Below that, there are icons for adding, undo, redo, help, and menu. On the right, there are buttons for 'Switch to Draft', 'Preview', 'Update', and a settings gear. The main content area features an image of people at a table, followed by a large heading 'Heading'. Below the heading is a paragraph of text with several words underlined in red. A yellow box highlights the block toolbar, which includes options for text (T), heading levels (H2, H3, H4), bold (B), italic (I), link, and a menu icon. A yellow arrow points from the 'H3' option in the toolbar to the 'H3' option in the 'Heading Settings' panel on the right. Below the heading is a subheading 'Subheading', with a yellow arrow pointing from the 'H3' option in the toolbar to it. At the bottom, there's another paragraph of text with several words underlined in red.

desert pupfish lampfish, "rock beauty snubnose eel."

# Image Alt Text

Visually impaired users using screen readers will be read an alt attribute to better understand an on-page image.

Alt text will be displayed in place of an image if an image file cannot be loaded.

3. Provides better image context/descriptions to search engine crawlers, helping them to index an image properly.

# Google Ads Tools

Keyword Planner

Find the right words to enrich  
your content

# Google Ads Keyword Planner Demo

What is Keyword Planner?

Why should I use it?

Let's see it in action

Make sure  
that other  
sites link to  
yours

Ask quality partners to place a link to your content on their page

This increases the value of the page in Google

Each naturally-linked page = 1 vote by Google

Votes cast by pages that are themselves "important" weigh more heavily and help to make other pages "important."

# The Dos of Page Linking

Use Natural linking

Only link from sites that are of high content quality

Only link from sites that perform well in Google Search (first 2 pages of search results)

# The Don'ts of Page Linking

DON'T PLACE LINKS ON  
DOORWAY PAGES

DON'T PLACE LINKS ON  
LINKS SCHEME PAGES

DON'T PLACE LINKS IF A  
LOW-QUALITY RECIPROCAL  
LINK IS REQUESTED

DON'T USE A CROSS-  
LINKING SERVICES

# Doorway Pages

Sites or pages created to rank highly for specific search queries

Can also lead users to intermediate pages that are not as useful as the final destination.

Having multiple domain names or pages targeted at specific regions or cities that funnel users to one page

Pages generated to funnel visitors into the actual usable or relevant portion of your site(s)

Substantially similar pages that are closer to search results than a clearly defined, browseable hierarchy

# Link Schemes

Any links intended to manipulate page rank or a site's ranking in a search engine

Any behavior that manipulates links to your site or outgoing links from your site

Excessive link exchanges ("Link to me and I'll link to you") or partner pages exclusively for the sake of cross-linking

Creating links that weren't editorially placed or vouched for by the site's owner on a page, otherwise known as unnatural links

# Page Optimization

Make pages primarily for users, not for search engines.

Use headings, sub-headings and bold text to convey importance

Use links in the content where they will add value

Create page URL that directly relates to page content

Create page title that accurately describes page – This is what gets bookmarked by browsers and what shows in browser tab

Add meaningful titles and descriptions to images and links

Work in Google Ads keywords where appropriate

# Bottom Line

# Content Hands-on

Headings `<h1>`

Sub-headings: `<h2>`, `<h3>`, `<h4>`

Link title attribute

Image alt text attribute

Bolded text
