

Kiwanis Competition

Covid has changed my life in so many ways such as having to wear a mask everywhere we go, not being able to eat out. At first my parents wouldn't let my younger sibling and I go to the store with them. They would either keep us home or send us to our uncle's house. When covid is over we are planning on going camping and on road trips. Another thing that affected My family's lives is that we had to stay home and could not go see our friends. Kiwanis can help the kids in our community recover and thrive by blood donations, Donate medical supplies, Donate meals to Construction workers, Doctors and Nurses, Support local farmers, Donate clothes to the orphanage, Donate to local shelters, If you're healthy and not at risk, now is a great time to volunteer, Soup kitchens need healthy servers and cooks, Food pantries need volunteers to help hand out food, Homeless shelters need help with cleaning, feeding, and supporting those who make use of their services, Lend a hand in whatever way you can.
